

Created in 2017 by the late Suzanne West, clean-tech pioneer and Imaginary Energy founder, the CBC began with a strong mandate—uniting the companies, researchers and organizations within one of Canada’s most unique and transformative technology sectors.

The vision that captured the imagination of the CBC’s founder and supporters was the potential for blockchain applications to help Canada overcome some of its biggest economic challenges, from high transaction and business costs to inefficiencies in government bureaucracies. As the technology has evolved, so have its uses; the nation’s most important industries like oil & gas, agriculture, logistics and financial services are now actively pursuing an optimized digital future enabled by blockchain applications.

The Canada Blockchain Consortium (CBC) is the country’s primary organization representing its growing blockchain technology ecosystem.

With support from our valued sponsors including RBC, Deloitte, Miller Thomson, McMillan and Accenture

The CBC is here to educate, advocate and build platforms for the technology to thrive and integrate with other innovation communities. In doing so, we’re creating an international reputation for Canada as a leader in this emerging field. Contact us to discover how you can get involved with the CBC and participate in our exciting blockchain ecosystem.

Monthly draw

Exclusive promotions

Logo displayed at all monthly events

1 Blockchain 101 class taught by CBC to your organization per year

Job posting to CBC's website

A panel at one of our Summits or Symposium, allowing your company to be profiled stronger at the large events we host every year

1 month where we feature your company and blockchain topics of choice. This allows for greater profiling of your organization and the company may also pick the speakers

Automatic silver level sponsorship to either the Symposium or Summit that are held annually

Company name cited on any research paper that CBC produces in the calendar year
